Summary

Deconstruct the problem, find the solution - this is what excites me about software development. As a developer I can implement responsive design, dynamic functionality, and asynchronous API integration. I can build back end middleware and endpoints, with server-side data modeling and persistence. Ultimately, I just enjoy figuring things out and making it work.

Skills

Front End

JavaScript • React • Redux
jQuery • HTML5 • CSS3

Back End

Node.js • Express • MongoDB
REST APIs • Mocha & Chai

Dev Tools

Git • GitHub • NPM
Chrome Dev Tools • Heroku

Recent Projects

[Elements](#)

My most recent obsession, a card game of my own creation. Built with MERN stack (MongoDB, Express, React, Node).

[Hire Me Faster](#)

A CRM to streamline the job application grind. Built with Node, Express and Mongo.

[Movie Ideas](#)

A tool to find movies using dynamic user input. Implements responsive design and asynchronous API integration.

Experience

THINKFUL

October 2018 – Present

Apprenticeship

- Learned industry best practices and practical software development standards with a focus on JavaScript, HTML5, CSS3, jQuery, Node.js, React, Redux, and algorithms & data structures.
- Created and deployed several mobile-first applications with deep focus on clean readable code.
- Collaborated several hours every week with a senior web developer.

VOLVO CARS OF AUSTIN

October 2017 – September 2018

New Car Sales

- Excelled in high pressure environment where income was reflective of performance.
- Frequently earned salesman of the month.

Education

THE OHIO STATE UNIVERSITY

Bachelor of Science, Biochemistry

- Studied from 2012 -2014
- Left to pursue a full-time income

THINKFUL

Full Stack Software Development

- Completed six months of full-time software development training.
